

1.0 THE NATURE AND SCALE OF OUR BUSINESS

- 1.1 The manufacture and sale of gasket sheeting, cut gaskets, fluid instrumentation and spiral wound gaskets covering most industrial applications with manufacturing plants located at Perth, Melbourne, Gladstone and Auckland with sales / administration offices throughout Australia, New Zealand, Thailand and Singapore.
- 1.2 Further, the processes employed in flange management, joint integrity, hydraulic bolt tensioning and site services.

2.0 OUR COMMITMENT

- 2.1 We will strive to minimise the impact on our physical and social environment by managing our operations to achieve long-term environmental sustainability.
- 2.2 We will comply to all relevant legislation and other requirements.

3.0 OUR STRATEGY

- a) Ensure environmental sustainability of our operations by measuring and reducing use of energy and other physical resources, recycling and promoting the re-use of our products wherever possible;
- b) Continuously measure and reduce emissions and discharge of pollutants;
- c) Conduct regular risk assessments addressing the environmental impact of our operations;
- d) Demonstrate to our customers how Klinger products can be used to reduce leakage and emissions, thereby assisting them to achieve their own environmental objectives;
- e) Develop and maintain a Business Management System ("BMS") that allows us to meet or exceed the ISO14001:2004 Standard;
- f) Ensure that we address, adhere to and keep up to date with the relevant legal and statutory requirements;
- g) Ensure our Policy remains appropriate to the business and is reviewed at least annually at the management review.
